Designing Atmosphere

POISE is a flexible shelving system designed by danish designer Anders Hermansen. The modular shelving system is based on one simple T-module, which multiplies in height and length without any excess material.

Anders Hermansen graduated from the Royal Danish Academy of Fine Arts, mastering industrial design and furniture architecture. In Hermansens' designs there are references to both the maritime world, but also to the simplicity and clean lines you often find in the Japanese décor. He strives to create and design functional furniture above all, but also furniture to engage with and furniture that can help sustain a pleasant atmosphere.

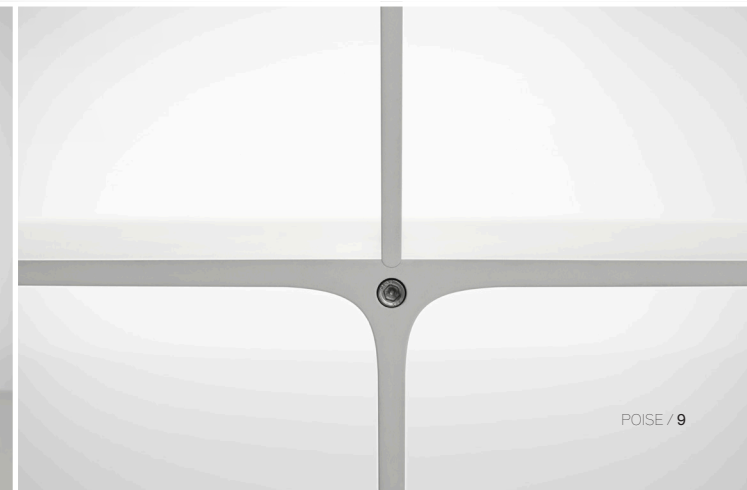

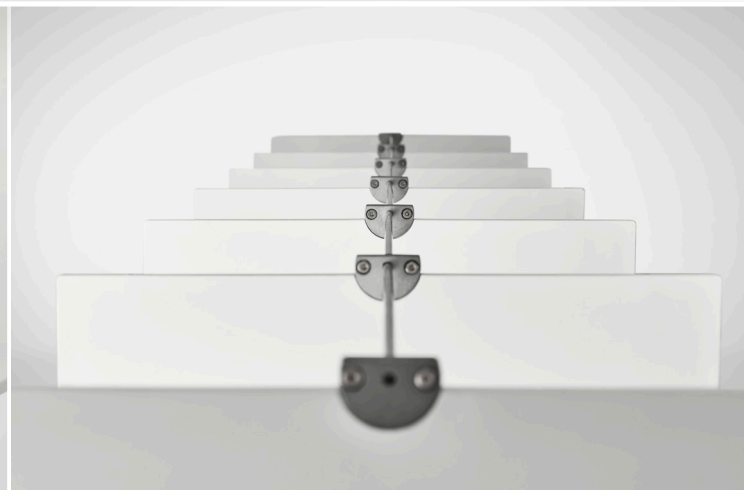

SIMPLICITY

One socket
One T-module
Two steel wires
Two zink brackets

+ Your imagination
= Endless possibilities

ULTIMATE VERSATILITY

Its modular T-shaped elements can be stacked or placed next to one another with the possibility to add corners for the ultimate versatility.

ENDLESS POSSIBILITIES

POISE is designed with a simple and sculptural expression that radiates elegance and clean lines. POISE is more architecture than a piece of furniture. It defines its surroundings and adds atmosphere to the room.

DEFINES SPACES WITHOUT BECOMING A FOCAL POINT

It delicately delineates its surroundings without taking up much space, physically or visually. Designed as a simple sculptural expression, it exudes great elegance yet doesn't dominate the room.

POISE® Configuration

Create your own personal configuration. Simply choose the length and height and whether you want to add corners.
